INSPIRED BY LIGHT, SHAPED BY NATURAL BEAUTY

LUMINA is born of hope; a promise for the places we are yet to go and the spaces we are yet to create. Inspired by the first rays of light touching the world's highest peaks, Lumina captures the calm before motion, the moment when the mountains are stirred from their silence. From that stillness we draw our inspiration, shaping light into form so that we may hold something of the mountain's peace within our walls.

Each surface is engineered to embody that tranquility; creating natural beauty through world-class engineering. In Lumina, technology refines what nature began, radiating clarity, serenity, and timeless design into every environment it touches. At the core of Lumina lies a relentless commitment to excellence in craftsmanship. Every surface is an intersection of art and engineering.

Tested, refined, and perfected by hands that understand both the science of precision and the poetry of design.

From the sourcing of raw materials to the polish of the final edge, we honor the integrity of every step. This devotion ensures not only beauty, but performance. Surfaces that endure, inspire, and elevate.

Lumina Surfaces creates refined countertop slabs inspired by mountain light, quiet strength, and intentional craftsmanship. Each surface is engineered to bring clarity, calm, and enduring beauty into the heart of the home where form, function, and feeling meet.

Lumina Surfaces slabs are engineered with precision and refined through restraint. Designed to honor material integrity, each surface reveals depth, balance, and clarity as light interacts with form.

COLLECTIONS

CANVAS COLLECTION

These colors perfectly captures the opulence of the most coveted marbles in its designs. Each surface in the collection features the innovative **RGS material**, developed through Phi 4R+ Technology and its revolutionary formula that Removes any material containing crystalline silica from its composition; includes up to 90% of Recycled materials in the body of the slab; **Reuses almost 100% of the water** needed in the production process; and Respects the well-being of the communities involved, lowering to the maximum extent its carbon footprint.

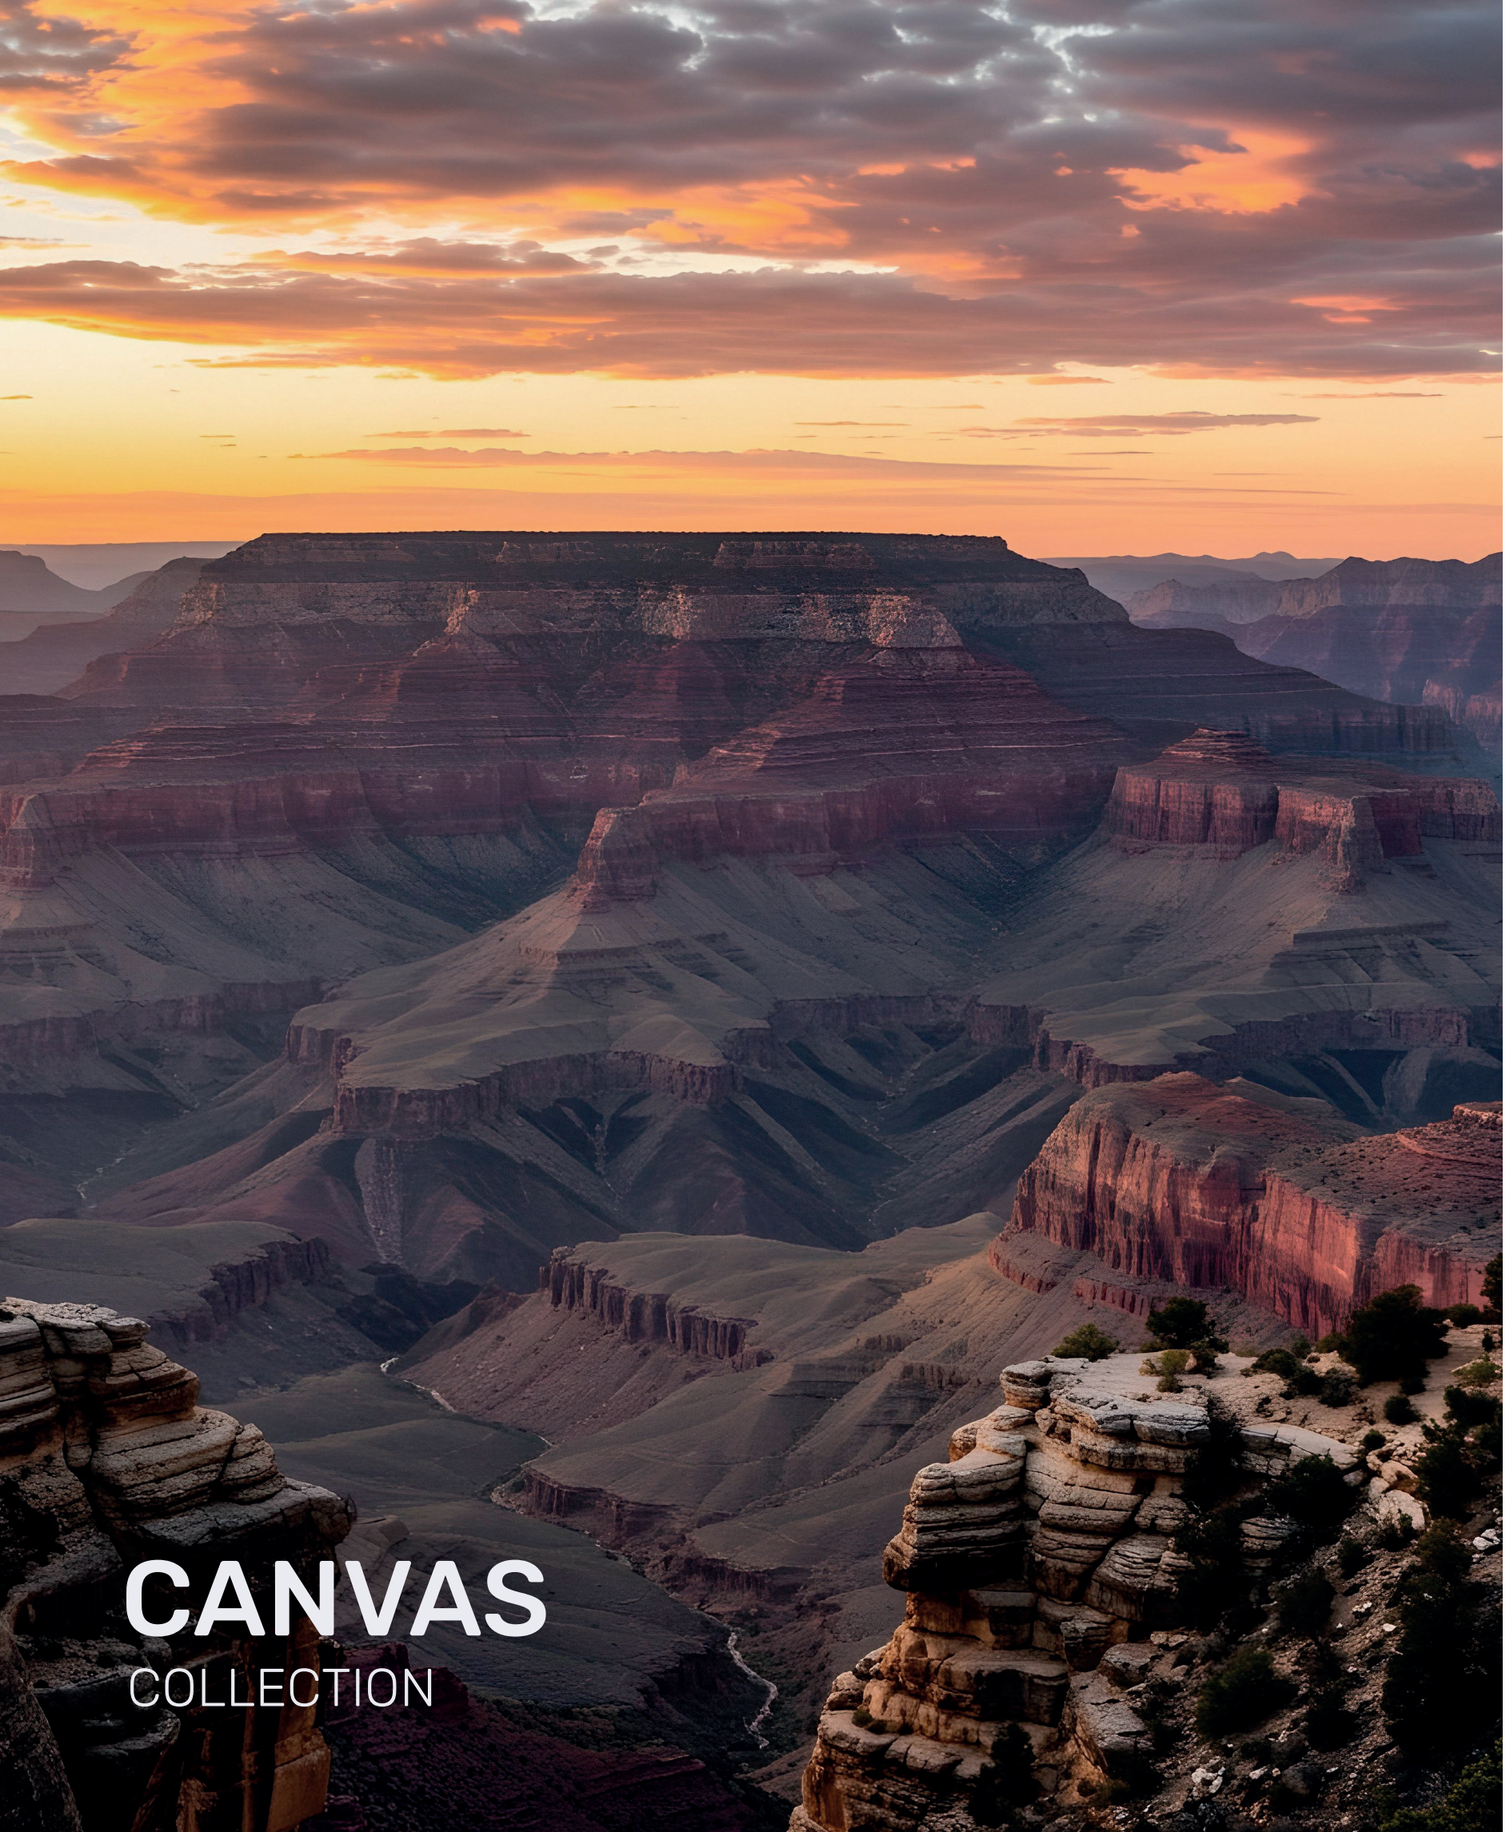

CHROMA COLLECTION

A curated selection of stones that brings together the essential designs that any marble lover would want in their home with a modern twist, resulting in a fresh and distinctive proposal. Each surface in the collection features the innovative RGS material, developed through **Phi 4R+ Fullbody Technology** and its revolutionary formula that **Removes any material containing crystalline silica** from its composition; includes up to **90% of Recycled materials** in the body of the slab; Reuses almost 100% of the water needed in the production process; and Respects the well-being of the communities involved, lowering to the maximum extent its carbon footprint.

PERFECT
FULL BODY

WITH FULLBODY TECHNOLOGY

Each pattern runs through the body of the slab offering great realism and movement. Combined with the innovative Nano-Ink Technology, which penetrates up to 1mm beneath the surface of LUMINA SURFACES, it results in 3D hyper-realistic designs with unmatchable authenticity and long-lasting color stability.

Nano·Ink
PRINTING TECHNOLOGY

A UNIQUE WAY OF PRINTING

Under high temperature and high pressure, Nano Ink Technology penetrates up to 1mm beneath the surface of LUMINA, creating 3D patterns with unmatchable authenticity and long-lasting color stability.

LUMINA introduces a groundbreaking printing method that overcomes the drawbacks of preceding generations of engineered stone, where top surface-only printing often leads to fading patterns over time.

TRUE NATURAL BEAUTY

TRUE NATURAL BEAUTY

Amazing light reflection, color brightness and high definition in every pattern create realistic details for a natural appearance.

ETERNAL COLOR

ETERNAL COLOR

Color remains unchanged and stable over time without losing intensity. Better light reflection, brightness and clarity in colors than any other engineered stone available. Non-yellowing white backgrounds

DEPTH & TRANSLUCENCY

DEPTH AND TRANSLUCENCY

Thanks to an even purer translucency, it provides each pattern with a deeper visual strength, delivering supreme authenticity in each design.

HD HIGH DEFINITION PRINT

HIGH-DEFINITION PRINT

Unsurpassable high-definition sharpness of print with neat lines, which are clear and impeccably delineated. Deep visual strength in each pattern.

A NEW DIMENSION HAS BEEN REVEALED

THE INFINITE EXCELLENCE OF RECYCLED GLASS SURFACES

In the pursuit of perfection, LUMINA Surfaces evolves toward a new concept of engineered surfaces, crafted with a more sustainable and respectful vision. The new and revolutionary Recycled Glass Surfaces (RGS) is the first material that combines the most remarkable qualities of traditional quartz surfaces with a more sustainable formula, which includes, exclusively, crystalline silica-free components.

Made with CRYSTALLINE SILICA Free materials

RECYCLED GLASS SURFACES

RECYCLED GLASS + HIGH PERFORMANCE FORMULA

With up to 90% of recycled components, free from crystalline silica, RGS is formulated to be the greenest synthetic material available on the market. The manufacturing technology, Phi 4R+ Technology delivers a safer and more sustainably product that contributes to the well-being of the communities involved in its fabrication process.

OUR PRIORITY: A BETTER WORLD

A CRYSTALLINE **SILICA-FREE** REVOLUTION

The stone industry is undergoing a transformative journey. The increasing regulations on crystalline silica in synthetic stones have prompted companies to rethink the immediate future of the sector.
Once again, LUMINA proves its visionary approach by anticipating market demands and taking the lead in driving change with RGS. A material designed with cutting-edge technology that maintains the highest standards of high-end quartz surfaces but is made with crystalline silica-free components.

This milestone is the result of LUMINA tireless work on R+D for new technologies, applications and aesthetics in the industry. In 2017, the company initiated an ambitious research process to gradually reduce crystalline silica form our surfaces.

In 2020, thanks to the revolutionary 4R Technology, implemented on LUMINA, we launched the first surface on the market made with crystalline silica free materials. By 2024, all LUMINA products are manufactured with crystalline silica-free materials powered by the cutting-edge Phi 4R+ Technology and it's revolutionary 4R+ Formula.

Safety and sustainability have always been the guiding principles of LUMINA. Our main concern is to assure a healthy work environment, and the well-being of the communities involved. Certificates as the Environment Product Declaration (EPD) reaffirms LUMINA's commitment to a transparent process aimed at sustainability.

ANTI-STAIN **LIFETIME WARRANTY**

Anti Stain **LIFETIME** ∞ **WARRANTY**

neos

Repel the Unwelcome

Nano Enhancement of Surfaces (NEOS), is a high-performance stain and substance repellent technology developed by our engineers.

Invisible to the naked eye, NEOS has been scientifically formulated to produce a hybrid protectant with physical characteristics that resists staining, keeps surfaces clean and guards them against everyday wear and tear. With NEOS, LUMINA Surfaces are safely protected against the most common household chemicals.

Stain Resistant

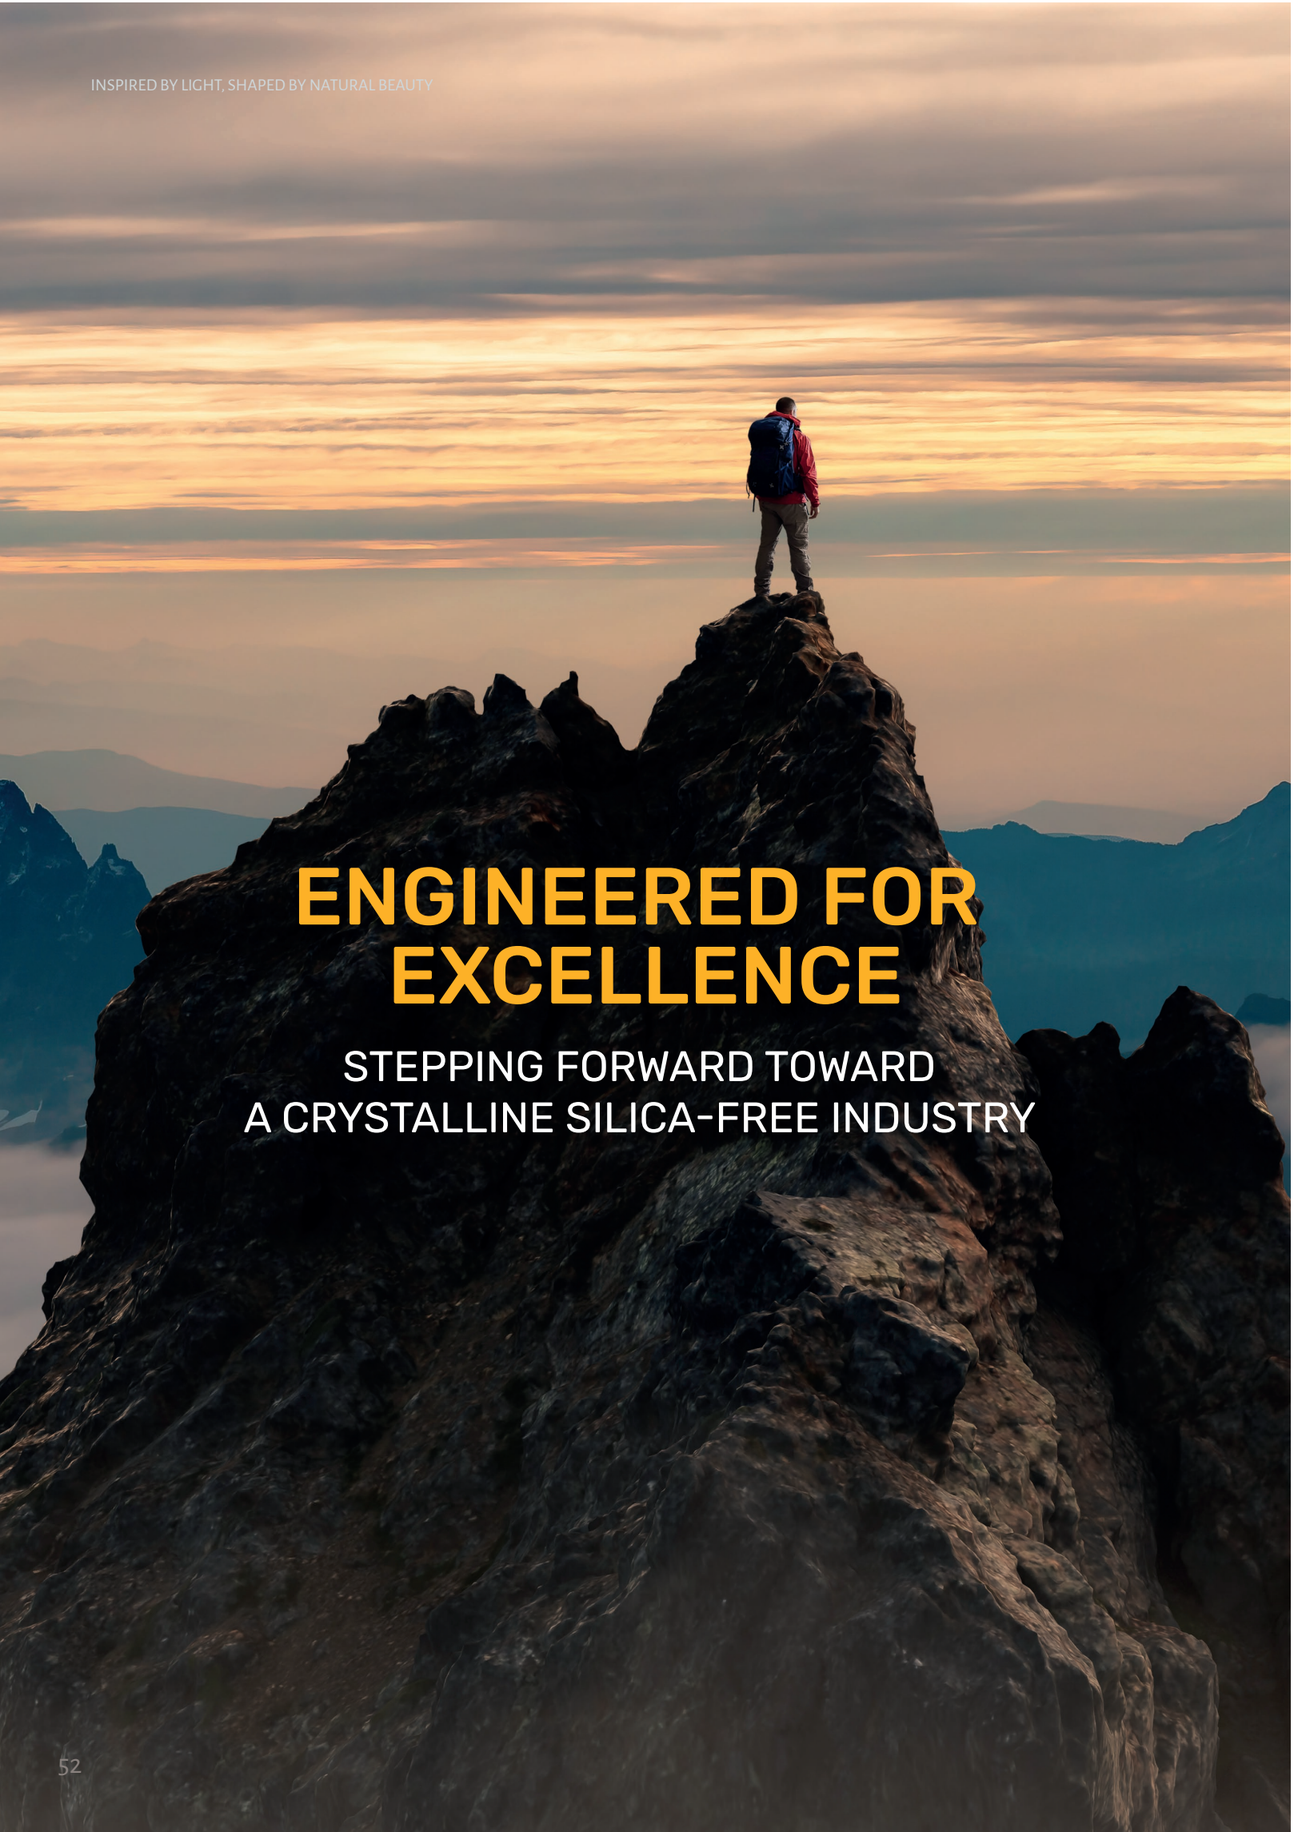

Food Safe

Durable

Easy Maintenance

Chemical Resistant

This patented technology has been specifically developed to ease the cleaning and maintenance with a minimum effort, keeping your surfaces look new for longer. Only NEOS technology protects your countertops with a permanent bond which lasts forever, making LUMINA Surfaces the most durable product in industry.

ENGINEERED FOR EXCELLENCE

STEPPING FORWARD TOWARD A CRYSTALLINE SILICA-FREE INDUSTRY

NEW FORMULA

RESPONSIBILITY BUILT INTO EVERY SURFACE

4R+
REMOVE
REUSE
RECYCLE
RESPECT

REMOVE

We remove all the materials containing crystalline silica from our formula. People's health and safety are our top priorities. LUMINA is totally safe for end users, and their handling by workers during fabrication is completely secure.

REUSE

PHI 4R+ technology reuses nearly 100% of the water required in the slab manufacturing process.
t contributes to keeping rivers and oceans clean and preserving their biodiversity by achieving a zero-water discharge. This revolutionary material stands as a testament to innovation, redefining industry standards.

RECYCLE

LUMINA is composed of up to 90% recycled materials, such as glass. By reducing the use of raw materials, the carbon footprint generated during the material production process is significantly reduced. At the same time, we achieved a significant improvement in the use of post-consumer content, resulting in less waste in landfills.

RESPECT

A more sustainable and respectful manufacturing process is possible with PHI 4R + Technology thanks to the use of recycled content, the elimination of crystalline silica materials, the harnessing of water, and waste management. LUMINA minimizes its environmental impact by optimizing the manufacturing process of the slabs.

OUR COMMITMENT IS FIRM, OUR ACTIONS HONEST.

LUMINA demonstrates its dedication to assessing the ecological footprint of its products with the EPD certification. **The Environment Product Declaration** provides a reliable, transparent and certifiable environmental profile and highlights environmentally friendly products based on life cycle assessments (LCA).
